

CALIFORNIA HEALTH CARE FACILITY

Crosby Group is the Structural Engineer-of-Record for the new 1.2 million square foot California Health Care Facility located on 400-acres in Stockton, California. This large-scale design-build Health Care Facility is designed to meet the growing medical and mental care needs of inmate-patients within the California Department of Corrections and Rehabilitation system. The single-story, campus-style facility houses 1,722 inmate patients, encompasses over 35 separate buildings, and met an incredibly demanding 2-year start-to-finish design-build schedule.

Outside the secure perimeter is a 30,440sf U-shaped Administration building with offices, training rooms, break rooms and open office space. At the core of the secure facility stands an 158,000sf Facilities Shared Services (FSS) building providing health and support spaces such as a dialysis clinic, standby emergency medical services, diagnostic imaging and procedure center, D&T center management, physical medicine and rehabilitation, medical outpatient clinic, dental clinic, activity therapy/religious programs, pharmacy, specimen collection and processing, central health records, board of parole hearings, education program, library, visiting and program management. Surrounding the core FSS building is a series of Housing Units ranging from 30 to 100-beds of various medical or mental health care levels depending on the residing inmate-patients including low acuity cubicle housing, low-acuity cell housing, high-acuity housing, intermediate care facility housing, and acute psychiatric program and intermediate care facility housing. The entire facility is surrounded by a secure perimeter fence with intermittent guard towers and controlled entry points.

LOCATION:
Stockton, California

CONSTRUCTION COST:
\$514 Million

COMPLETION:
2013

CLIENT REFERENCE:
William Prindle, Vice President
HDR Architecture, Inc.
